

Subject Index—Volumes 310 to 321

A

- Abdominal injury, pelvic trauma and, **318:61**
 Abduction test, knee instability and, **321:3**
 Abscess, upper-extremity, efficacy of postirrigation culture, **310:208**
 Acetabular component
 cemented, total hip replacement and, **311:69**
 cementless
 metal-backed, **311:76**
 revision total hip arthroplasty and, **319:201**
 total hip arthroplasty and, **317:19**
 micromotion, **310:103**
 porous, revision surgery and, **319:191**
 Acetabular cup
 metal-backed, polyethylene wear and, **319:303, 319:317**
 polyethylene particles and oxidation and, **319:54**
 Acetabular labrum
 nerve endings, **320:176**
 tears, **311:60**
 Acetabular modularity, complications, **319:85**
 Acetabular prosthesis, modular, polyethylene wear debris and, **317:44**
 Acetabular T-type fracture, **314:234**
 Acetabular version, axiolateral radiography and, **316:106**
 Acetabulum, reconstruction
 morselized allograft and, **319:184**
 severe bone deficiency and, **314:170**
 Acetylcholine, no reflow phenomenon and, **314:122**
 Achilles tendinopathy, chronic, **316:151**
 Achilles tendon, rupture
 bilateral simultaneous, **320:231**
 late versus early repair, **317:150**
 Acromioclavicular dislocation, **318:54**
 Acromioclavicular-hook plate, complete acromioclavicular separation and, **314:134**
 Acromioclavicular joint disorder, arthroscopic management, **316:276**
 Acromioclavicular ligament, surgical management, **314:134**
 Actinomycin-D, chemosensitivity assay for osteosarcoma and, **313:279**
 Adactylous hand, microsurgical reconstruction, **314:45**
 Adactyly, anatomic features, **314:45**
 Adamantinoma, olecranon, **310:194**
 Adenosine cyclic phosphate, plasminogen activator system in bone and, **313:54**
 Adenosine triphosphate (ATP), extracellular, **313:92**
 Adhesion molecules, metastasis and, **312:10, 312:34**
 Adipose tissue, bone marrow, **313:120**
 Adrenal hyperplasia, pigmented micronodular, severe symptomatic osteopenia and, **313:220**
 Age, bone formation around orthopaedic implants and, **312:253**
 Aging. See also Elderly
 musculoskeletal apparatus and, **316:5**
 osteoporosis and, **316:10**
 physiologic alterations and, **316:80**
 proximal femur and, **316:31**
 Alendronate, bone metastasis and, **312:19**
 Alkaline phosphatase, calcification and, **314:266**
 Alkylating agents, bone metastasis and, **312:95**
 Allograft, cancellous, expression of matrix genes during incorporation, **317:263**
 Aminoglutethimide, breast cancer and, **312:95**
 Amitriptyline, pain management in skeletal metastases and, **312:187**
 Amputation
 above-knee, changes in hip muscles and, **319:276**
 type IIIC open tibial fracture and, **318:95**

Subject Index—Volumes 310 to 321

A

- Abdominal injury, pelvic trauma and, **318:61**
 Abduction test, knee instability and, **321:3**
 Abscess, upper-extremity, efficacy of postirrigation culture, **310:208**
 Acetabular component
 cemented, total hip replacement and, **311:69**
 cementless
 metal-backed, **311:76**
 revision total hip arthroplasty and, **319:201**
 total hip arthroplasty and, **317:19**
 micromotion, **310:103**
 porous, revision surgery and, **319:191**
 Acetabular cup
 metal-backed, polyethylene wear and, **319:303, 319:317**
 polyethylene particles and oxidation and, **319:54**
 Acetabular labrum
 nerve endings, **320:176**
 tears, **311:60**
 Acetabular modularity, complications, **319:85**
 Acetabular prosthesis, modular, polyethylene wear debris and, **317:44**
 Acetabular T-type fracture, **314:234**
 Acetabular version, axiolateral radiography and, **316:106**
 Acetabulum, reconstruction
 morselized allograft and, **319:184**
 severe bone deficiency and, **314:170**
 Acetylcholine, no reflow phenomenon and, **314:122**
 Achilles tendinopathy, chronic, **316:151**
 Achilles tendon, rupture
 bilateral simultaneous, **320:231**
 late versus early repair, **317:150**
 Acromioclavicular dislocation, **318:54**
 Acromioclavicular-hook plate, complete acromioclavicular separation and, **314:134**
 Acromioclavicular joint disorder, arthroscopic management, **316:276**
 Acromioclavicular ligament, surgical management, **314:134**
 Actinomycin-D, chemosensitivity assay for osteosarcoma and, **313:279**
 Adactylous hand, microsurgical reconstruction, **314:45**
 Adactyly, anatomic features, **314:45**
 Adamantinoma, olecranon, **310:194**
 Adenosine cyclic phosphate, plasminogen activator system in bone and, **313:54**
 Adenosine triphosphate (ATP), extracellular, **313:92**
 Adhesion molecules, metastasis and, **312:10, 312:34**
 Adipose tissue, bone marrow, **313:120**
 Adrenal hyperplasia, pigmented micronodular, severe symptomatic osteopenia and, **313:220**
 Age, bone formation around orthopaedic implants and, **312:253**
 Aging. See also Elderly
 musculoskeletal apparatus and, **316:5**
 osteoporosis and, **316:10**
 physiologic alterations and, **316:80**
 proximal femur and, **316:31**
 Alendronate, bone metastasis and, **312:19**
 Alkaline phosphatase, calcification and, **314:266**
 Alkylating agents, bone metastasis and, **312:95**
 Allograft, cancellous, expression of matrix genes during incorporation, **317:263**
 Aminoglutethimide, breast cancer and, **312:95**
 Amitriptyline, pain management in skeletal metastases and, **312:187**
 Amputation
 above-knee, changes in hip muscles and, **319:276**
 type IIIC open tibial fracture and, **318:95**

- Analgesics, pain management in skeletal metastases and, **312:187**
- Androgen
bone mass in women and, **311:278**
metabolism, **311:278**
prostaglandin production and, **313:36**
- Anesthetic, radial epicondylalgia and, **316:99**
- Aneurysmal bone cyst, treatment, **311:157**
- Aneurysm, peroneal artery, delayed diagnosis, **316:211**
- Angiogenesis, pericytes and, **313:81**
- Angioplasty, excimer laser and, **310:72**
- Angiosarcoma, **311:276**
- Ankle
coverage, free vascularized soft tissue flaps and, **314:26**
fracture
gait asymmetry and, **311:262**
skeletal stabilization and, **318:95**
pain, **314:281**
polylevolactide screws and, biocompatibility and degradation, **320:101**
tibiotalar contact area, **320:182**
- Ankle arthrodesis, arthroscopic, rheumatoid arthritis and, **320:110**
- Anterior cruciate ligament reconstruction, **311:142**
other ligaments of knee and, **311:176**
- tears
occult osseous lesions and, **313:187**
untreated, **317:227**
- Anterior drawer sign, **321:3**
- Anterior drawer test, reliability, **317:237**
- Anterior-posterior stability, condylar knee replacement and, **310:87**
- Anterior rotary drawer test, **317:237**
- Anterolateral rotatory instability test, **317:237**
- Antiandrogens, prostate cancer and, **312:95**
- Antiinflammatory drugs, bone repair and remodeling and, **313:270**
- Apophysis, thoracic spine, bone morphogenetic protein-4 and, **318:243**
- Arachidonic acid metabolism, no reflow phenomenon and, **314:122**
- Argon laser, **310:6**
- Argyrophilic nucleolar organizer region quantification, benign and malignant bone tumors and, **310:229**
- Arm, pain, **318:279**
- Arteries, microsurgery and, **314:4**
- Arteriography, skeletal metastasis and, **312:64**
- Arthritis. See also Rheumatoid arthritis
elbow, **318:152**
nitric oxide and, **312:275**
septic, femoral head reconstruction and, **314:214**
upper extremity, elderly and, **316:63**
- Arthrodesis
arthroscopic ankle, rheumatoid arthritis and, **320:110**
chronic infection of total knee arthroplasty and, **319:285**
- knee
external fixators and, **316:134**
failed total knee replacement and, **321:138**
- Arthroplasty
distraction. See Distraction arthroplasty
femoral. See Femoral arthroplasty
hip. See Hip arthroplasty
low friction
long-term results, **319:4**
plastic wear and, **318:160**
patellofemoral, **321:162**
primary hip. See Primary hip arthroplasty
total hip. See Total hip arthroplasty
total knee. See Total knee arthroplasty
total shoulder. See Total shoulder arthroplasty
- Arthroscopic ankle arthrodesis, rheumatoid arthritis and, **320:110**
- Arthroscopic knee surgery
elderly and, **316:50**
saphenous nerve injury and, **320:88**
- Arthroscopy
acromioclavicular joint disorder and, **316:276**
elbow, **313:140**
excimer laser, **310:72**
frozen shoulder and, **319:238**
laser, **310:21**
second look, meniscal repair and, **314:185**
- Articular capsule, surgical management, **314:134**
- Articular cartilage
aging and, **316:5**
bone morphogenetic protein-4 and, **318:243**
CO₂ laser surgery and, **310:48**
fibril profiles, **313:224**
Ho:YAG laser irradiation and, **310:52**
- Articular disc, surgical management, **314:134**
- Articular step-off, remodeling, **314:253**
- Articulating cartilage, structure and disease, **317:3**
- Articulating spacer, infected total knee arthroplasty and, **321:45**
- Aspirin, pain management in skeletal metastases and, **312:187**

Athlete

- bilateral simultaneous Achilles tendon rupture and, **320:231**
- elbow injuries and, **310:257**
- olecranon physeal nonunion and, **311:125**
- stress fractures and, capacitive coupled electric fields and, **310:145**
- untreated anterior cruciate tears and, **317:227**
- ATP. See Adenosine triphosphate
- Autograft, cancellous, expression of matrix genes during incorporation, **317:263**
- Autograft bone, autoclaved, vascularized bone and bone marrow and, **320:220**
- Autotransfusion, total hip arthroplasty and, cost effectiveness, **315:212**
- Axillary nerve, degeneration in shoulder joint, **320:55**
- Axiolateral radiography, acetabular version and, **316:106**

B

- Back pain, low, **321:270**
- Bartter's syndrome, idiopathic carpotarsal osteolysis and, **310:120**
- Biceps brachii, distal, repair, **317:1114**
- Biodegradable implant, in vitro degradation and release characteristics, **315:272**
- Biopsy
 - infected nonunion of tibia and, **315:176**
 - skeletal metastasis and, **312:64**
- Bipolar endoprosthesis, severe bone deficiency and, **314:170**
- Bisphosphonates
 - bone metastasis and, **312:19, 312:95**
 - hypercalcemia of malignancy and, **312:51**
 - osteoporosis and, **316:10**
- Blastomycosis, forearm synovium and, **317:223**
- Bleomycin, chemosensitivity assay for osteosarcoma and, **313:279**
- BM 21.0955, bone metastasis and, **312:19**
- BMP. See Bone morphogenetic protein
- Bone
 - aging and, **316:5**
 - cyst, aneurysmal, treatment, **311:157**
 - deficiency, acetabular reconstruction and, **314:170**
 - formation
 - orthopaedic implant and, age and, **312:253**
 - osteoblasts and, **313:19**
 - prostaglandins and, **313:36**
 - prosthetic loosening after total hip replacement and, **313:154**
 - giant-cell tumor, **321:245**
 - growth, periosteal stripping and, **320:211**
 - healing
 - collagen and, **318:265**
 - microgravity and, **318:222**
 - osteosarcoma cell extracts and, **313:129**
 - induction, osteosarcoma cell extracts and, **313:129**
 - late growth, osteoarthritis and, **313:159**
 - lengthening, callotaxis method and, **311:222**
 - loss, age-related, **313:69**
 - mass in women, androgen and, **311:278**
 - metabolism
 - aging and, **316:10**
 - prostaglandins and, **313:36**
 - mineral density
 - forearm immobilization and, **317:199**
 - total knee replacement and, **321:68**
 - morphogenesis, matrix-induced, endogenous lipids and, **313:120**
 - myeloma and, **312:34**
 - pain, radiotherapy and, **312:105**
 - remodeling
 - aging and, **316:10**
 - antiinflammatory drugs and, **313:270**
 - collagenase and, **313:47**
 - plasminogen activator inhibitor system and, **313:54**
 - repair, antiinflammatory drugs and, **313:270**
 - resorption
 - malignancy and, **312:51**
 - prostaglandins and, **313:36**
 - tumors
 - argyrophilic nucleolar organizer region quantification and, **310:229**
 - MIC2 detection, **310:176**
 - vascularized, autoclaved autograft bone and, **320:220**
- Bone allograft
 - frozen, lipid extraction by chloroform methanol and, **311:232**
 - processed, ethylene oxide sterilization and, **318:259**
- Bone cell
 - cultured, calcium response to fluid flow, **313:256**
 - function, plasminogen activator inhibitor system and, **313:54**
- Bone-forming tumor, argyrophilic nucleolar organizer region quantification and, **310:229**

Bone graft

- cancellous, expression of matrix genes during incorporation, **317:263**
- diaphyseal, flexural rigidity in partially demineralized, **317:254**
- heat treatment and, **316:267**
- severe bone deficiency and, **314:170**
- tibial nonunion and, **321:223**
 - infected, **315:176**, **315:192**
- vascularized, long-term results, **311:258**

Bone graft harvest site fracture, **310:252**

Bone marrow

- adipose tissue, **313:120**
- bone morphogenetic protein-4 and, **318:243**
- demineralized, as carrier for bone marrow, **313:8**
- injectable, osteogenic repair and, **313:8**
- vascularized, autoclaved autograft bone and, **320:220**

Bone marrow injury, osteogenic reactions and, **313:64**

Bone marrow stromal cells, **313:115**

Bone matrix, as source for bone growth factors, **313:19**

Bone metastasis

- breast cancer and, prognostic significance, **312:89**
- development, **312:45**
- diagnosis and assessment of response to treatment, **312:64**
- facilitation and suppression, **312:34**
- magnetic resonance imaging and, **312:76**
- management
 - methotrexate-loaded acrylic cement and, **312:173**
 - new devices and prostheses and, **312:160**
 - pathologic fracture risk and, **312:120**
- mechanisms, **312:19**
- pain management, **312:187**
- radiotherapy and, **312:105**
- rehabilitation and, **312:197**
- treatment, systemic, **312:95**
- Union Internationale Centre de Cancer Criteria, **312:95**

Bone morphogenetic protein (BMP), **313:115**

- bone metastasis and, **312:34**

Bone morphogenetic protein-1, sublocalization on chromosome 8, **311:199**

Bone morphogenetic protein-2, recombinant, long-term healing of bone and, **318:222**

Bone morphogenetic protein-4, skeletal tissue and, **318:243**

Brachial plexus injury, free muscle transplantation and, **314:104**

Breast cancer

- bone metastasis and, prognostic significance, **312:89**
- endocrine therapy, **312:95**
- lymphangiosarcoma and, **320:135**

Bupivacaine, pain management in skeletal metastases and, **312:187**

Buprenorphine, pain management in skeletal metastases and, **312:187**

C

Cadherins, metastasis and, **312:10**, **312:34**

Calcific myonecrosis, **318:205**

Calcifying tendinitis, extracorporeal shock wave therapy and, **321:196**

Calcitonin

- bone metabolism and remodeling and, **316:10**
- hypercalcemia of malignancy and, **312:51**
- osteoporosis and, **316:10**

Calcitonin gene-related peptide, no reflow phenomenon and, **314:122**

Calcium

- bone metabolism and remodeling and, **316:10**
- no reflow phenomenon and, **314:122**

Callotaxis method, bone lengthening and, **311:222**

Calvarial periosteum, bone morphogenetic protein-4 and, **318:243**

Cancellous bone graft, expression of matrix genes during incorporation, **317:263**

Cancer

- breast. See Breast cancer
- hypercalcemia and, **312:51**
- pain management and, **312:187**
- prostate. See Prostate cancer
- skeletal metastasis and, **312:148**

Cancer metastasis. See Metastasis

Capacitive coupling

- stress fracture and, **310:145**
- tibial nonunion and, **321:223**

Capsulorrhaphy, posterior, total shoulder arthroplasty and, **313:135**

Carbamazepine, pain management in skeletal metastases and, **312:187**

Carboplatin, chemosensitivity assay for osteosarcoma and, **313:279**

Cardiovascular fitness, severity of gonarthrosis and, **313:169**

Carpotarsal osteolysis, Bartter's syndrome and, **310:120**

- Cartilage. See also specific type
 articulating, structure and disease, **317:3**
 hip, biomechanical properties in animal models, **316:254**
 metabolism, nitric oxide and, **312:275**
- Cartilage-forming tumor, argyrophilic nucleolar organizer region quantification and, **310:229**
- Castration, prostate cancer and, **312:95**
- Catalase, no reflow phenomenon and, **314:122**
- CD44, cancer metastasis and, **312:10**
- Ceftriaxone, scoliosis surgery and, **315:209**
- Cell adhesion molecules
 families, **312:10**
 metastasis and, **312:10, 312:34**
- Cell proliferation, osteogenic growth peptide and, **313:64**
- Ceramic femoral head, modular, **317:57**
- Cervical cord neurapraxia, epidemiology and histopathology, **321:259**
- Cervical spine
 degenerative disease, elderly and, **316:70**
 injury, pathomechanics and pathophysiology, **321:259**
- Charcot joint, total knee arthroplasty and, giant thigh mass and, **317:159**
- Charnley acetabular cup, polyethylene particles and oxidation and, **319:54**
- Chemotaxis, cancer cells and, **312:19**
- Chemotherapy, bone metastasis and, **312:34, 312:95**
- Chest injury, femoral canal reaming and, **318:91**
- Chondroitinase ABC, degenerative intervertebral disc and, **318:214**
- Chondroma, extraskeletal, **315:257**
- Chondromyxoid fibroma, **316:284**
- Chondroplasty, laser, **310:21**
- Chondrosarcoma, **319:327**
 metacarpal, subcutaneous involvement, **316:189**
 Swarm rat, hyperthermia and, **311:227**
- Chromosome 8, BMP-1 sublocalization, **311:199**
- Chymopapain, percutaneous disc decompression and, **310:58**
- Cisplatin, chemosensitivity assay for osteosarcoma and, **313:279**
- Clancy technique, anterior cruciate ligament reconstruction and, **311:142**
- Clavicle
 congenital pseudarthrosis, **315:242**
 fracture, **318:54**
- Clodronate
 bone metastasis and, **312:19, 312:95**
 hypercalcemia of malignancy and, **312:51**
- Clonidine, pain management in skeletal metastases and, **312:187**
- Cloning, **320:247**
- Cloning vector, **320:247**
- CO₂ laser, **310:6**
 articular cartilage surgery and, **310:48**
 meniscal tissue and, **310:14**
 meniscectomy and, **310:21**
 polymethylmethacrylate removal and, **310:67**
- Cobalt chrome, cementless femoral components and, **313:146**
- Cobalt chrome total hip arthroplasty, uncemented, osteolysis and, **317:29**
- Coccidioidomycosis, **314:281**
- Codeine, pain management in skeletal metastases and, **312:187**
- Collagen
 calcification and, **314:266**
 pericyte differentiation and, **313:81**
 superfamily, **318:265**
 tendon, ligament, bone healing and, **318:265**
- Collagenase
 bone remodeling and, **313:47**
 connective tissue remodeling and, **313:47**
- Common peroneal nerve, compression by cyst of lateral meniscus, **316:131**
- Compartment syndrome
 acute, tibial fractures and, **315:163**
 acute of leg, **317:219**
 bilateral femoral fractures and, **320:115**
 calcific myonecrosis and, **318:205**
 diagnosis, **312:266**
- Complementary DNA library, **320:247**
- Component fixation method, osteolysis in total knee arthroplasty and, **321:86**
- Compression fracture, spinal, elderly and, **316:70**
- Compression loading, microdamage accumulation in lumbar vertebrae and, **311:190**
- Computed tomography (CT)
 forearm compartment pressures and, **312:266**
 proximal tibial coverage during total knee arthroplasty and, **311:146**
 resection of osteoid osteoma of hip and, **310:170**
 skeletal metastasis and, **312:64**
 spinal metastasis and, **312:148**
- Condylar knee replacement, anterior-posterior stability and, **310:87**
- Congenital pseudarthrosis
 clavicle, **315:242**
 tibia, **314:37**

- Connective tissue, remodeling, collagenase and, **313:47**
- Continuous passive motion, total knee arthroplasty and, **321:208**
- Coracomioclavicular ligament, surgical management, **314:134**
- Coronoid process, ulnar, soft tissue attachments, **320:154**
- Corticosteroids
- bone metabolism and remodeling and, **316:10**
 - experimental induction of osteonecrosis and, **316:235**
 - interdigital neuroma and, **317:185**
 - pain management in skeletal metastases and, **312:187**
- Corticosterone, plasminogen activator system in bone and, **313:54**
- Cortisone, radial epicondylalgia and, **316:99**
- Cranial nerves, bone metastasis and, radiotherapy and, **312:105**
- CT. See Computed tomography
- Curettage
- desmoplastic fibroma and, **320:142**
 - giant-cell tumor of bone and, **321:245**
- Cushing's syndrome, severe symptomatic osteopenia and, **313:220**
- Cyclophosphamide
- bone metastasis and, **312:95**
 - chemosensitivity assay for osteosarcoma and, **313:279**
- Cyclosporine, vascularized tissue transplantation and, **320:194**
- Cyproterone acetate, prostate cancer and, **312:95**
- Cyst
- bone, aneurysmal, treatment, **311:157**
 - forearm, **318:152**
 - lateral meniscus, common peroneal nerve compression and, **316:131**
- Cytokines
- cancer metastasis and, **312:19**
 - hypercalcemia of malignancy and, **312:51**
 - osteolytic, **312:51**
 - plasminogen activator system in bone and, **313:54**

D

- Deep vein thrombosis
- elective knee replacement and, **321:19**
 - enoxaparin and, **319:215**
 - magnetic resonance imaging and, **319:223**
- Degenerative disc disease, bone metastases and, **312:76**
- Degloving injury, **314:19**

- Degloving wounds, pelvic trauma and, **318:61**
- Deltoid ligament, tibiotalar contact area and, **320:182**
- Desipramine, pain management in skeletal metastases and, **312:187**
- Desmoplastic fibroma, **320:142**
- Developmental dysplasia of hip, total hip replacement and, **311:40**
- Dexamethasone
- nerve compression pain and, **312:187**
 - plasminogen activator system in bone and, **313:54**
 - rat marrow stromal cells and, **313:27**
- Dextromoramide, pain management in skeletal metastases and, **312:187**
- Diabetic foot, neuropathic, vascular assessment, **320:95**
- Diaphyseal bone graft, partially demineralized, flexural rigidity and, **317:254**
- Diazepam, pain management in skeletal metastases and, **312:187**
